

pesticides to kill dandelions or fertilizers to do the opposite will introduce chemicals into the same water system we eventually take our drinking water from.

Dean Huschle: People just turn on the faucet and they expect water to be there and we want to make sure that the water is there for them too, but they need to be aware of where that water comes from and how it gets to their faucet and that they have the biggest control over how the water is going to be there for their children down the road too.

[Drain]

[Music]

From Formation to Faucet: Groundwater in Southeast Minnesota was produced by Mary Henke-Haney as part of her comprehensive exercise in Geology at Carleton College.

It featured the voices of Tim Cowdery, Jeff Green, Ross Hoffman, Dean Huschle, Steve Robertson, and Tony Runkel.

Thanks to the Canon River Watershed Partnership, the Minnesota Geological Survey, the Minnesota Groundwater Association, the Minnesota Department of Health, the Minnesota Department of Natural Resources, the Northfield Water Division, and the United States Geological Survey

This project would not have been possible without support from the Carleton Geology department, the Carleton Cinema and Media Studies department, and KRLX Radio 88.1fm, online at KRLX.org.
